*To take advantage of this special offer, or for more information, please contact us via email  
Email: [goldenkalamazoo@yahoo.com](mailto:goldenkalamazoo@yahoo.com)  
Tel: +1 916 203 1821*

*Note: this offer is available from the 10th October 2019 until 31st May 2020.*

*Our product line features a range of unique, handcrafted, 100% natural herbal products (without any additional additives), as outlined below:*

### ***Immunall:***

*Immunall is a tried and tested product designed to support the effective functioning of the immune system and other vital metabolic functions, to help maintain good energy levels and to help boost stamina levels. Immunall has been developed to support the overall health of your horse and assists in a speedy recovery from training/racing.*

### ***Muscle and Joints:***

*AfterAce, as its name suggests, is a unique product specifically designed to support a speedy recovery after training/racing and has been developed to aid the reduction of waste products in the body, such as muscle enzymes and lactic acid. AfterAce helps to facilitate the healthy functioning of the muscles and supports muscle suppleness.*

### ***Ty-4-Up:***

*Ty-4-Up is a new product and has recently been launched on the market. Ty-4-Up is distinctively developed to help facilitate healthy joints, movement and the effective functioning of the muscles, helping to support increased muscle suppleness, power and stamina. This product contains a selective combination of herbs, which have been scientifically proven to optimise and promote the elimination of waste products through the kidneys and urinary tract, to support a speedy recovery and to help increase work-capacity.*

*Moreover, this product features one of the most effective herbal adaptogens known to date. An adaptogen has unique properties designed to increase resistance to stress-factors and help metabolic and physiological processes adapt to new conditions and demands.*

***Ty-4-Up is therefore perfectly suited to the dynamic and demanding lifestyle of the racehorse and will help to increase energy levels, greater work-capacity and to promote faster recovery.***

## EXPLANATION SHEET

### IMMUNALL

#### Immune System

Helps the body to fight Viral Infections.

On race tracks, Horses gather from different areas, spreading the Viruses invisible to us.

The Immune System will challenge the Virus, at cost of Energy resulting in Down-time of the Racehorse.

#### Energy Levels

Stamina and Concentration will be helped resulting in a delay of tiredness.

#### Speedy Recovery

Horses coming home from races can struggle to eat up their rations and can take days to recover, opening the door to infections.

Immunall helps the Horse to recover swiftly and helps the Horse to eat after races sooner.

### MUSCLE AND JOINTS

During racing High levels of Waste products are generated, resulting in Acidification of Muscle systems, resulting in Tying up of any form and Slower Finishing the Race.

### TY-4-UP

The same base as Muscle and Joints but now with an extra Herb to help the Horse to Metabolise the sugars from the feed into Energy, avoiding cases as;

- Muscle stiffness before warming up
- Too high Muscle Tonus
- Energy release at wrong moment due to Stress hence wasting Energy
